

Introducing the **Destiny UV-C Clean Air Hand Dryer**

A patented smart UV-C light hand drying system for clean dry hands.

Introducing a **groundbreaking enhancement** to a product we all know well, the lavatory air hand dryer commonly found in restrooms and locker rooms.

THE ISSUE

Air hand dryers were hailed as a way to be green and save paper, however, they have one major shortcoming.

These devices draw air from within the restroom, circulating contaminated air onto your freshly washed hands.

While researchers have known for over 60 years that tiny particles are released into the air when flushing, scientists observed that within 8 seconds of flushing, particles were ejected at a speed of 6.6 feet per second, reaching a height of 4.9 feet above the toilet, with larger droplets landing on nearby surfaces. That contaminated air will be blown onto your clean hands with a traditional dryer.

THE SOLUTION

Introducing the **Destiny UV-C Clean Air Hand Dryer**. This patented smart UV-C light system eliminates all living organisms and organic contaminants using light.

When air enters the dryer, it passes through a HEPA filter to remove larger particles. Afterward, the air moves into a light-tight chamber where the UV-C lights eliminate all organic materials. The air is heated to maximize drying and then directed to precision-designed air nozzles to increase air speed for quick hand drying.

Our clean air hand dryer is easy to install and can replace a traditional contaminant-prone dryer in minutes.

THE FEATURES

- A Quality stainless steel finish
- Power-110 vt, 50hz, 1000 watts
- 30,000 rpm Variable Motor Speed
- Replacement HEPA filters are available
- Our patented smart UV-C system
- Precision air nozzles for quick drying
- Internal adjustable air speed and air temperature setting
- LED hand light for better drying visibility
- LED Destiny logo lights up when in use
- ETL listed
- Dryer size: 280mm x 347 mm x 100mm
- Dryer weight: 5 Kgs
- Noise level: 75 dBA
- Custom finish treatments by request for bulk orders
